Technical Project Delivery Manager | Data, Analytics & AI Programs| PMP®

Strategic Project Delivery Leader with 18+ years of experience, specializing in **leading the end-to-end delivery of enterprise-scale data, analytics, and AI solutions**. Proven expertise in managing **complex, multi-stream programs** using **Agile, Scrum, and SAFe methodologies** to align cross-functional technical teams with business objectives. Combines deep hands-on expertise in cloud data platforms (AWS, Azure) and big data ecosystems (Spark, Kafka, Hadoop) with exceptional skills in **stakeholder management, delivery governance, and risk mitigation**. Adept at bridging the gap between executive strategy, architectural vision, and on-time, high-quality execution

CORE COMPETENCIES

Program & Delivery Leadership	Technical Delivery Expertise	Stakeholder & Team Leadership
• End-to-End Program Delivery	• Data & AI Platform Delivery	• Executive Communication & Reporting
• Agile/Scrum/SAFe Methodologies	• Cloud Migration (AWS, Azure, GCP)	• Cross-Functional Team Coordination
• PI & Sprint Planning	• Big Data (Spark, Kafka, Hadoop, Presto)	• Vendor & Stakeholder Management
• Release & Dependency Management	• Modern Data Platforms (Databricks, Snowflake)	• Technical Mentorship
• Budget, Timeline & Risk Management	• GenAI & MLOps Lifecycle	
• Delivery Governance & KPI Tracking	• Data Governance, Security & Compliance (GDPR)	

TECHNICAL SKILLS

- **Project & Delivery Tools:** Jira, Confluence, Azure DevOps, GitLab
- **Cloud Platforms:** AWS (S3, Glue, Lambda, SageMaker), Azure (Data Factory, Synapse, ADLS, Databricks), GCP (BigQuery)
- **Big Data & Processing:** Apache Spark, Kafka, Hadoop (HDFS, Hive, Pig), Apache NIFI, Presto
- **Databases:** Oracle, PostgreSQL, Greenplum, MongoDB
- **AI/ML & Analytics:** Generative AI (LLMs, LangChain, Hugging Face), PyTorch, TensorFlow, Tableau
- **Methodologies:** SAFe, Agile, Scrum, DevSecOps, CI/CD

PROFESSIONAL CERTIFICATIONS

- PMP® – Project Management Institute
- Data Landscape of GenAI for Project Managers – PMI®
- Practical Application of Generative AI for Project Managers – PMI®
- Cloudera Certified Developer for Apache Hadoop (CCDH)
- **Experienced in SAFe framework** for large-scale enterprise program delivery.

PROFESSIONAL EXPERIENCE

Ingestion Framework Lead – Assistant Vice President, Standard Chartered Bank – GBS, Chennai, India (Apr 2021 – Present)

- **Project Leadership:** Led the end-to-end delivery of a **multi-workstream program** to architect and deploy an enterprise, multi-cloud ingestion framework handling **high-throughput data (>5 TB/day) from 200+ sources** for AI/ML initiatives.
- **Stakeholder & Executive Communication:** Partnered with Enterprise Architecture, Engineering, and Business stakeholders to define project scope and strategic goals. Regularly presented project status, risks, and outcomes to senior leadership, ensuring alignment with digital banking objectives.

- **Cross-Functional Team Management:** Directed cross-functional teams across Technology, Product, and Business units, fostering collaboration and ensuring on-time delivery in a fast-paced, regulated environment.
- **Agile & DevSecOps Implementation:** Orchestrated the implementation of Agile and DevSecOps practices, establishing a CI/CD pipeline with Azure DevOps that **improved deployment frequency by 80%** and enhanced reliability.
- **Risk & Ambiguity Management:** Proactively identified project risks and technical challenges, implementing mitigation strategies to navigate regulatory constraints and evolving requirements, ensuring project success.
- Established delivery governance and ensured compliance by embedding data quality checks, security controls, and regulatory adherence (GDPR, BCBS 239) into the project lifecycle.

Project Manager – Big Data, Uber India Research and Development, Bengaluru, India (Dec 2020 – Apr 2021)

- **Key AI/ML Project Delivery:** *Managed the delivery of **petabyte-scale ETL pipeline projects** critical to Uber's advanced analytics and machine learning platforms, ensuring system performance and data pipeline stability.*
- **Global Team Leadership:** Led a globally dispersed project team, streamlining task execution and removing blockers to improve team velocity and ensure on-time project milestones were achieved.
- **Data-Driven Project Governance:** *Implemented **data-driven delivery governance** through performance analysis and monitoring strategies for projects involving Hadoop, Spark, and Kafka ecosystems.*
- **Executive Reporting:** Conducted analyses of project outcomes and system stability, delivering comprehensive reports to engineering leads and business stakeholders to guide future investment decisions.

Lead Consultant - Genpact, Hyderabad, India (Sep 2015 – Dec 2020)

- **Project Leadership & Strategy:** Led the end-to-end project management of large-scale data modernization initiatives, including the design and deployment of scalable Hadoop data pipelines, which enhanced operational efficiency and advanced analytics capabilities for processing high-volume machine data.
- **Cloud Migration Program Management:** Spearheaded cloud transformation program governance, successfully migrating on-premise data pipelines to AWS, delivering a serverless architecture that **reduced TCO by 40%**.
- **Cross-Functional Team Coordination:** Directed cross-functional teams comprising development, operations, and infrastructure specialists to automate deployment processes, resulting in reduced project delivery times and enhanced system reliability.
- **Stakeholder & Vendor Management:** Collaborated with business stakeholders and cloud vendors (AWS) to define project requirements, manage expectations, and deliver cloud-native data solutions that aligned with long-term strategic goals.
- **Operational Excellence & Support:** Managed the project for end-to-end data platform support, overseeing the installation, configuration, and maintenance across environments, which minimized downtime and ensured high availability for critical business operations.

Project Leader - L&T Technology Services Limited, Bengaluru, India (Apr 2014 – Sep 2015)

- **Infrastructure Project Delivery:** Project-managed the architecture and implementation of high-availability database clusters with multi-site disaster recovery, delivering resilient infrastructure projects on time and within scope.
- **Stakeholder & Technical Alignment:** Partnered with development and operations teams as a key project stakeholder to guide technology selection and implementation, ensuring database solutions were aligned with project and business objectives.
- **Risk Management & Quality Assurance:** Strengthened project deliverables by proactively identifying risks to data integrity and security, performing root-cause analysis on issues, and implementing preventive measures to ensure high-quality outcomes.
- **Client Advisory & Solution Design:** Advised client development teams on secure and efficient database design for single-tenant and multi-tenant architectures, effectively translating business needs into technical project requirements.
- **Performance Optimization Projects:** Conducted performance tuning and optimization as a key project milestone, achieving significant improvements tailored to specific project SLAs and workload requirements.

Associate Technical Architect - Tech Mahindra Ltd., Pune, India (Dec 2005 – Apr 2014)

Key Deliverables:

- Delivered actionable business insights and improved decision-making by leveraging advanced statistical analysis and translating complex datasets into comprehensive, executive-level reports.

- Enhanced data accuracy and operational efficiency by designing and implementing scalable data collection systems across multiple business functions.
- Improved system reliability and performance by integrating data from heterogeneous sources and proactively maintaining and optimizing database environments.
- Enabled advanced analytics and large-scale reporting by developing and testing custom Hive scripts for high-volume data processing within Hadoop ecosystems.
- Reduced downtime and improved development cycles by supporting root cause analysis and troubleshooting of data processing jobs, scripts, and configurations in both standalone and pseudo-distributed environments.

EDUCATION

- **Master of Computer Applications (M.C.A.)**, Madras University, Chennai, India (2003)
- **Bachelor of Science in Computer Science**, Kakatiya University, Warangal, India (2000)
